

HJ 1064

Angle ring (L-shaped thrust collar) for single row cylindrical roller bearings, NU or NJ design

Angle rings (L-shaped thrust collars) are used either with NU design cylindrical roller bearings to locate the shaft axially in one direction, or with NJ design bearings to locate the shaft axially in both directions. The rings are made of carbon chromium steel and are hardened and ground. They are supplied as separate components.

- Locate the shaft axially if there are no NJ or NUP design locating bearings within the product range
- Provide an extended inner ring seat for heavily loaded bearings in the locating position
- Simplify design or mounting procedures

Overview

Dimensions

Bore diameter	320 mm
Outside diameter	376 mm
Width in bore	19 mm

Properties

Material	Bearing steel
Coating	Without

Technical Specification

Dimensions

d	320 mm	Bore diameter
d ₁	≈ 376 mm	Outside diameter
B ₁	19 mm	Width contacting inner ring side face
B ₂	36 mm	Width
r _{3,4}	min. 4 mm	Chamfer length radial direction (angle rings)

Mass

Mass angle ring

5.65 kg
